

## Team Icebreakers for Robotic Caregivers

You're going to be working as a team throughout the term. A good place to start is to get to know one another by sharing your answers to stimulating questions.

First, take some time by yourselves to read through the following questions and think about them. After everyone has a moment to read through them and think, discuss your answers to each of the three lists of questions as a group. Be sure to give everyone on your team a chance to share their answers before moving onto the next list of questions.

1. Why are you taking this class? How did you find out about it? What do you hope to learn?
2. Is there any time in your life when you would have wanted a robotic caregiver for yourself? If so, what is the situation and what would you have wanted the robotic caregiver to do?
3. Is there any time in your life when you would have wanted a robotic caregiver for someone else? If so, what is the situation and what would you have wanted the robotic caregiver to do?
